ALEXANDRU SOVER

Prof. Dr.-Ing. | Professor

Plastic Processing and Smart Materials
Ansbach University of Applied Sciences, Germany

PROFESSIONAL EXPERIENCE

Professor of Plastic Processing and Smart Materials (2015–present)

Ansbach University of Applied Sciences, Germany

Head of Research and Development (2011–2015)

Wirthwein AG, Creglingen, Germany

Senior Engineer (2010–2011)

Impetus Plastics Engineering GmbH, Bad Aibling, Germany

Head, Steinbeis Innovation Centre for Applied Material, Production and Process Technology (2008–2010)

Zwickau, Germany

Research Associate (2006–2008)

University of Applied Sciences Zwickau, Institute for Manufacturing Technology

Research Associate (2002–2006)

Institute for Polymer Materials and Plastics Engineering and Institute of Mechanical Engineering, TU Clausthal

EDUCATION

PhD thesis (2006–2010)

Clausthal University of Technology, Germany

Topic: Characterisation of Impact Behaviour for Elastomeric Materials at High Testing Speed

Diploma thesis (2001)

TU Clausthal, Germany

Erasmus/Socrates scholarship. Topic: Portable Pipe Beveling Machine

Mechanical Engineering studies (1996–2002)

North University of Baia Mare, Romania

Degree: Engineer

RESEARCH FIELDS

- Materials science
- Plastics processing technology
- Plastic testing technology and analytical methods
- Recycling of plastic materials
- Laser processing technology
- Laser decoating technology
- Product development and simulation
- Additive manufacturing (FDM, SLA, SLS)
- Smart materials

PERSONAL INTERESTS

Technology, travelling and archery

ALEXANDRU SOVER

ADDITIONAL QUALIFICATIONS

- Certification under VDI/VDE/GESA 2636 guidelines to conduct training in measurement engineering with strain gauges.
- Varied experience with measurement techniques.
- Experience developing, designing and manufacturing different testing equipment.
- National and international research publications and conference presentations.
- Patent applications.

PROFESSIONAL PROFILE

Professor at Ansbach University of Applied Sciences, Germany, specialising in plastic processing and smart materials. Professional experience spans university research, industrial research and development, polymer and plastics engineering, measurement methods, testing equipment, and additive manufacturing.

Research interests include materials science, plastics processing and testing, recycling, laser processing, product development and simulation, additive manufacturing, and smart materials.
